

Environmentally Aware.

Exclusive Functionality.

Introducing a new Screen fabric style that is good for your home and good for the environment.

**Exclusive GreenScreen® Sea-Tex™ Fabric**

Every year an estimated 9 million tons of plastic waste are dumped into the world's oceans, killing sea animals. Hunter Douglas is proud to be part of a program that has reclaimed over 30 tons of washed ashore plastic and turned it into Sea-Tex™ Fabric. Our oceans are our future, help us to protect them.
